Corporate Philosophy

We are committed to create attractive towns and regions with steadfast devotion.

Though times change, we believe that there are immutable values and values that are consistently recognized regardless of the times. These values include faith and trust. History will determine what was correct and what was mistaken. Our objective is to conduct business operations that will withstand the judgment of history. Based in Fukuoka, we have become engaged in a wide array of businesses. These include urban development, residential development, office and retail facility development and operation, and hotel development and operation. We have accumulated a track-record as a region-based developer by seeking that which is one step ahead of the times, and slightly different from that which already exists. Fortunately, there are advantages to having a franchise in vibrant Fukuoka, and we have won acclaim from our clients throughout the region, Japan, and countries in the world. Now, we are taking a step outside of Fukuoka into the rest of Kyushu. We are taking this step because in our judgment, there will be a significant transformation in society and the financial industry in the future. We will adapt to these changes of the times, align our thinking with that of the people of the region, and continue to promote urban and regional development that conforms to tradition, culture, and nature. We will contribute to the region and to society with the belief that the only way to withstand the judgment of history is to honestly conduct business with an emphasis on trust.

Our corporate logo is a design that features the "F" of Fukuoka and the "J" of Jisho. In addition, the "J" shape is designed in such a way as to represent the Japanese archipelago, with the red area signifying Fukuoka and Kyushu. This corporate logo expresses our corporate approach of working to make Fukuoka and Kyushu more vibrant and enjoyable, and to conduct attractive urban and regional development.

Condominium Business

We are working to plan and develop condominiums that meet to the needs of the times in order to realize comfortable urban living.
We offer high-quality condominium life by formulating product designs that appropriately consider the environments and regional characteristics of each property.

We are facing a variety of challenges such as global environmental issues, an aging society with a declining birth rate, safety of food and comfortable regional community life. In order to meet these challenges there is no other option but to change our awareness and lifestyles. What kinds of residences are ideal for the coming age, and what sorts of townscapes and communities should we have? Fukuoka Jisho will continue to provide condominiums with new perspectives and ideas and which are based on the company’s track record and trust.

As of October 2012
**Condominium Business (Track Record of Sales)**

Fukuoka Jisho has sold more than 3,500 residential units with the Sunlife series launched in 1976 with Sunlife Nishi Koen, the Nexus series launched in 1989 with Nexus Kashii, and more. We have developed residences utilizing the local environments and regional features aiming to realize comfortable urban dwellings.
